

# Research requests and Provo City School District

All research in Provo City School District must be approved by the Research Committee.

All research applications are review the last Monday (of work, for example, the last Monday before Winter Break) of each month by the Research Committee.

If you are solicited to participate in a research study or survey, ask to see their approval letter. If they do not have an approval letter, please direct them to the application links below or Ron Twitchell.

The approval letter allows them to contact district schools and/or personnel. It does not mean that schools, administrators or other personnel have to participate. Any undue pressure to participate should be immediately reported to Ron Twitchell.

Any school or district personnel desiring to initiate a research study or survey should contact Ron Twitchell.
