

No-deductible Drug Coverage

Do you take medications in one of the categories listed on this page? We have good news for you! Some of our Health Savings Account (HSA)-eligible plans provide coverage for covered drugs in these categories even before you meet your deductible. If you are enrolled on one of these plans, you do not have to meet your deductible (cost-sharing still applies) before the drugs in one of the seven categories listed on this page are covered. To find out if your HealthSave plan includes this benefit, take a look at your Member Payment Summary (MPS).

We've listed the most commonly prescribed covered medications in these no-deductible categories: If you don't see the one you're looking for, you'll find a more complete Prescription Drug List in your Member Materials, or log in to *My Health* and use our online drug search.
