

Pharmacy Tips and Tricks

Did you know that not all pharmacies have the same price for medications? Prescription prices can vary from pharmacy to pharmacy, and even vary by location! With so much inconsistency, it's important to know where to go to get the best deal. This is especially true if you are enrolled in Provo City School District's high deductible health plan. Below you will find some suggestions and programs that can help you save money on your medications.

SelectHealth's Rx Savings Solutions - SelectHealth's Rx Savings Solutions program provides transparency into your prescription costs and shows you the lowest price at in-network pharmacies for medications you and your family take. To enroll, log in to your SelectHealth member account and search for the Rx Savings Solution program.

GoodRx Comparison Tool - The GoodRx Comparison tool allows you to compare drug prices at over 70,000 pharmacies across the country, including big chain stores and small, local pharmacies. Research over 6,000 drugs to find the best deal in your area. The GoodRx Comparison Tool also provides manufacturer's coupons for many medications along with discount programs, and tips on how to save money with generics, pill-splitting, and more. To access, simply go to www.goodrx.com, type in your zip code, and begin searching your medications.

Generic Medications - Did you know that most generic drugs are made up of the same active ingredients as name-brand drugs? Save money on your prescription drug costs by using generic medications when available. Generic drugs are as effective as their name-brand counterparts and cost significantly less. Always check with your provider prior to requesting to move to a generic medication.

If you have any questions, please contact Benefits at (801) 374-4879.
