

# Summer TIME ENERGY SAVINGS

## District Summer Shutdown

Whether your summer will involve traveling, an extensive to-do list, or just taking a deep breath, we hope you'll enjoy some much-deserved rest and relaxation.

**This shutdown period is an essential time for our energy program — now's the chance for you to do your part to conserve and help save money!** As you prepare for summer break, take a few minutes to ready your area for this vital shutdown.

Remember, *every dollar saved on energy is a dollar saved for education.*

**Do your part to support and fully participate in the energy conservation program**

### **Before the break:**

- Set local thermostats to 85 degrees
- Close all windows and blinds
- Please leave personal refrigerators empty, unplugged and doors propped open
- Turn off and unplug all devices including TVs, DVD players, projectors, audio systems, document cameras, computers, printers, etc.
